

MHCLG Fire Door Testing

Last year in a ministerial statement it was announced that the 30 minute fire doors manufactured by Manse Masterdor only lasted approximately 15 minutes. They also said 'We are continuing our investigations into the wider fire door market'. As a result of this in early October 2018 Ministry of Housing, Communities & Local Government (**MHCLG**) approached Humphrey & Stretton plc as a market leader for Fire Door Manufactures.

On Saturday 23rd February 2019 the Fire Testing took place in High Wycombe – We are delighted to say that our Fire Doors & Frames passed. MHCLG tested two 30 Minute doorsets, our test finished after 59 minutes with both doors passing!

The quality and performance of our product is the most important part of what we do. Through our product development we are always looking at ways to shorten lead times and improve performance of our product range.
