FIRST AID		
ROUTE OF EXPOSURE:	SYMPTOM:	FIRST AID TO BE APPLIED:
EYES	IRRITANT	Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes. Get medical attention if irritation persists after washing. A single exposure may cause the following adverse effects: Irritating to eyes. Symptoms following overexposure may include, Irritation. Redness.
INGESTION	HARMFUL	Rinse mouth thoroughly with water. Never give anything by mouth to an unconscious person. Give plenty of water to drink. Get medical attention if symptoms are severe or persist.
INHALATION	HARMFUL	Move affected person to fresh air at once. Get medical attention if symptoms are severe or persist. Development of symptoms may be delayed for 24 to 48 hours. Good general ventilation should be adequate to control worker exposure to airborne contaminants. Dust is severely irritating to the upper respiratory system. In case of possible exposure to degradation products, use suitable respiratory protection. Symptoms following overexposure may cause respiratory irritation. And coughing.

<b>SKIN</b>	<b>IRRITANT</b>	Remove contaminated clothing immediately and wash skin with soap and water. Get medical attention promptly if symptoms occur after washing.

**PRECAUTIONS TO BE TAKEN WHEN DEALING WITH THE FOLLOWING:**

<b>FIRE</b>	<p><b>Suitable extinguishing media</b> Alcohol-resistant foam. Water spray, fog or mist.</p> <p><b>Unsuitable extinguishing media</b> Do not use water jet as an extinguisher, as this will spread the fire.</p> <p><b>Protective actions during firefighting</b> Evacuate area. No action shall be taken without appropriate training or involving any personal risk. Move containers from fire area if it can be done without risk. Use water to keep fire exposed containers cool and disperse vapours. Dust may form explosive mixture with air. Take precautionary measures against static discharge.</p> <p><b>Special protective equipment for firefighters</b> Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.</p>
-------------	---

<b>DISPOSAL</b>	Avoid the spillage or runoff entering drains, sewers or watercourses. Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).
-----------------	---

<b>SPILLAGE</b>	<p><b>Small Spillages:</b> Move containers from spillage area. Eliminate all sources of ignition. Collect powder using special dust vacuum cleaner with particle filter or carefully sweep into suitable waste disposal containers and seal securely.</p> <p><b>Large Spillages:</b> Avoid generation and spreading of dust. Move containers from spillage area. Control run-off water by containing and keeping it out of sewers and watercourses. Collect powder using special dust vacuum cleaner with particle filter or carefully sweep into suitable waste disposal containers and seal securely. Eliminate all sources of ignition.</p>
-----------------	--

<b>STORAGE</b>	Store away from other materials. Eliminate all sources of ignition. Store away from the following materials: Oxidising materials. Keep container tightly sealed when not in use. Store in a dry place. Use appropriate containment to avoid environmental contamination. Store away from incompatible materials. Keep away from food, drink and animal feeding stuffs.
